Excerpt: . is 2.; and consequently, if the greaast product, viz. 2X 1000000=: 2000000, be substractcd from the dividend, the result will want 2 of the tiue remainder. To pi event such errors, and to put the work on a sure footing, find the carriage from tne left-hand column of the circles, add this carriage to the right-hand column, divide the sum by 1000000, and you will have a true quot, and a true remainder. The learner may look back to division of integers, where the method of dividing by 9,99,999 c. is explained. Hence Hence it follows, that if we add the cir-.428571, cles as they stand, without minding any car-.857142? riage from the left, and to the sum add the.454545, excrescent figure on the left of the decimal 3737o- point, we shall have the full sum of the cir-2 110628 cles, both as to...
