Reviews

It is one of the most popular pdf. It really is full of knowledge and wisdom. It has been developed in an exceptionally easy way and it is just right after I finished reading through this publication by which it really altered me, altered the way in my opinion.

There was also attached a small room which could be used for photography; it contained a small transit instrument which I made in the workshop, and a sidereal clock. Except a few photographs of the moon, taken with wet plates, and some experiments on solar radiation with thermo piles, little was done with this instrument. In 1881 I decided to build a new and large observatory, which would be attached to the house. A 24-inch silver-on-glass mirror, of 10 feet 6 inches focus, was ordered from Sir Howard Grubb, and it was erected on the old mounting. This was not found satisfactory, as the mounting was not stiff or heavy enough to carry the extra weight. In 1892 I decided to have the 24-inch mirror remounted by Sir Howard Grubb, and provided with his best form of driving clock and electrical control. The new mounting has given the greatest satisfaction. The position of the new observatory is, by the Ordnance Survey Map - Latitude 53 41 12 N. Longitude 0 29 586 W. In 1889 a physical laboratory was built adjoining the observatory, and a photographic dark room for the development of the astronomical plates. Adjoining this room is also the workshop, which contains a 6-inch Whitworth screw-cutting lathe, a shaping machine, and a drilling machine. These tools are driven by a 11/2 N. H. P. Crossley Gas Engine. About the Publisher Forgotten Books publishes hundreds of thousands of...
